

H1210 • Massachusetts

Relative to AI health communications and informed patient consent

Introduced

Risk: Medium

Comprehensive

Last Action (Feb 09, 2026): Accompanied a study order, see H5066

Summary

Bill H1210 is proposed to address AI health communications in Massachusetts, but specific mandates are speculative without the full bill text.

Business Impact

If you use AI in health communications in Massachusetts, you must ensure informed patient consent or face penalties.

Key Provisions

- The requirement for healthcare providers to disclose AI use in patient communications is speculative.
- Informed consent before employing AI tools in patient care is speculative.
- Claims about protecting patient privacy and enhancing trust in AI technologies are speculative without further details.

Compliance Checklist

- Obtain informed consent from patients before using AI in communications | Who: Healthcare providers and organizations | Penalty: Potential penalties for non-compliance may apply, specifics not detailed
