

# SB2381 • United States (Federal)

## PROACTIV Artificial Intelligence Data Act of 2025 Preventing Recurring Online Abuse of Children Through Intentional Vetting of Artificial Intelligence Data Act of 2025

Introduced

Risk: High

Comprehensive

Last Action (Jul 22, 2025): Read twice and referred to the Committee on Commerce, Science, and Transportation.

### Summary

The PROACTIV Artificial Intelligence Data Act of 2025 requires NIST to develop a framework with specific guidelines for detecting, removing, and reporting child pornography in AI datasets.

### Business Impact

If you use AI for content moderation, you must implement NIST's framework for child pornography detection by 2026 or face penalties.

### Key Provisions

- NIST is required to develop a framework for AI datasets with specific guidelines.
- The bill mandates the detection, removal, and reporting of child pornography in AI datasets.

### Compliance Checklist

- Develop and implement a framework for detecting child pornography in datasets | Who: Organizations and developers using AI systems | Penalty: Potential penalties for non-compliance to be established
- Ensure datasets are vetted for harmful content before use in AI training | Who: AI developers and data providers | Penalty: Potential penalties for non-compliance to be established

### Industries Affected

Data Processing

Artificial Intelligence

Technology
