

SB2766 • United States (Federal)

Consumer Safety Technology Act Digital Taxonomy Act Blockchain Innovation Act AI for Consumer Product Safety Act

Introduced

Risk: Medium

Study/Task Force

Last Action (Sep 10, 2025): Read twice and referred to the Committee on Commerce, Science, and Transportation.

Summary

The federal Consumer Safety Technology Act combines components focusing on AI for consumer safety, blockchain, and digital tokens, with studies to be reported by the FTC and Secretary of Commerce.

Business Impact

If you use AI for consumer products, you must comply with new safety guidelines once they are established or face penalties.

Key Provisions

- Combines multiple components with distinct focuses: AI for consumer safety, blockchain technology, and digital tokens.
- Establishes a pilot program for AI applications specifically to support the mission of the Consumer Product Safety Commission.
- Directs the Secretary of Commerce to study and report on blockchain technology separately from the FTC's study.
- Mandates the Federal Trade Commission to study and report on the use of tokens as part of the Digital Taxonomy Act.
- Focuses on enhancing the mission of the Consumer Product Safety Commission and assessing the feasibility of AI in consumer safety, including potential risks and benefits.
