## Summary

The New York AI Transparency for Journalism Act mandates AI developers to disclose details about training data used, allowing legal action for damages or injunctive relief.

## Business Impact

If you develop generative AI systems, you must disclose training data sources by January 1, 2025, or face legal action from journalism providers.

## Key Provisions

- Developers must disclose specific information about the source, nature, and extent of training data on their websites.
- Journalism providers can take legal action for damages or injunctive relief against non-compliant developers.
- Specific requirements or criteria for disclosure are outlined in the bill text.
