

SB2938 • United States (Federal)

Artificial Intelligence Risk Evaluation Act of 2025

Introduced

Risk: Medium

Comprehensive

Effective: Jan 01, 2025 | Last Action (Sep 29, 2025): Read twice and referred to the Committee on Commerce, Science, and Transportation.

Summary

The Artificial Intelligence Risk Evaluation Act of 2025 requires the Secretary of Energy to establish the Advanced Artificial Intelligence Evaluation Program. Specific objectives and provisions will be detailed once the full text is available. Potential stakeholders include AI developers, energy sector stakeholders, and regulatory bodies.

Business Impact

If you use AI in energy operations, you must comply with risk assessment guidelines by 2026 or face penalties and regulatory scrutiny.

Key Provisions

- Establishment of the Advanced Artificial Intelligence Evaluation Program
- Objectives and scope of the program to be detailed with full bill text

Industries Affected

AI Development

Energy
